

# How To: Set up your Blue Bamboo printer

This tutorial will guide you through the process of setting up your new printer, allowing you to print customer receipts.

**Step 1:**  
Turn the Blue Bamboo printer on by pressing the power button.

**Step 2:**  
Enable Bluetooth on your iPhone, iPod touch, or iPad by going into Settings, and tapping Bluetooth. Switch your Bluetooth setting to ON, as seen in the screen shot on the left. Your phone will now be able to locate the printer as a device that it can connect to. Tap on the name of the device that appears.

**Step 3:**  
You will then be asked to enter the Printer's unique PIN number in order to complete the connection. This PIN number can be found inside the printer, underneath the roll of paper, as seen on the left. Simply push up on the paper-slot's door to lift open the printer.

The printer's light will turn blue, indicating that you have successfully connected. You are now able to print receipts for your customers from Flash Valet.

Now, when you are closing out a customer's ticket, an option to print the receipt will appear. You are also able to print a receipt from a ticket's details from the app's History report.

Success!

Below you will find the Blue Bamboo Printer Installation Guide for your reference. We hope this has been helpful. If you have any questions, please do not hesitate to contact us at [support@flashvalet.com](mailto:support@flashvalet.com).

# P25 Printer
